

Interested in learning to fly? Then a “Discovery Flight” might be just the ticket for you!

A discovery flight is lesson one for either the Recreational or Private Licence. It is designed to show you what flying an airplane is like, a chance to explain what learning to fly is all about, and to meet the staff and tour around our flight school. It is not just an airplane ride. The Discovery Flight is separated into three parts; pre-flight briefing, the flight itself, and the post-flight briefing.

The Discovery flight starts with a Pre-flight Briefing in the office. Your instructor will explain exactly what you are going to do in the flight, taking into account such things as safety, the weather, and the aircraft. After answering any questions you may have, you and your instructor will complete a safety walk around of the aircraft together.

The second segment of the lesson is the fun part...we go FLYING! From the pilot's seat you will perform the checklist, start-up procedures and after a short demonstration, will taxi the aircraft to the runway. Once the pre-flight checks are completed, it's time to takeoff and “slip the surly bonds of earth.” In the air you will do most of the flying, experience how to turn, climb, descend, slow down and speed up: generally getting the feel for the airplane. You will be surprised how easy it really is and how awesome it feels to be flying the airplane. After joining the circuit pattern at the airport you and your instructor will land the aircraft.

Once done taxiing and shutting down, you will be debriefed by your instructor, describing how you did and what to look out for on your next flight. To complete the Discovery flight your instructor will tour you around the school/airport and airplanes, allowing you to explore the facility.

A discovery flight usually takes an hour to complete including a typical 30 min flight. Longer flights are available.

Book your discovery flight by emailing info@westav.ca, phone **250-442-8616**. A “Discovery Flight” will be you and an instructor in a RANS Coyote II, Light Sport Ultra-light aircraft.

Discovery Flight Only \$108.50 BOOK TODAY!

DISCOVERY FLIGHTS

****Book a flight today! **** ****Gift Certificates Available****

Discover the exciting world of aviation, take the controls and experience flying a Light Sport Aircraft or just sit back and enjoy the spectacular view. Your pilot will explain the basics of flight and how to use the controls.
